

# Non-Insulated Bins

## The DS800

Pallet-sized, lightweight and double-walled, these containers are specifically engineered for pickling, storing, refrigerating and transporting wet or dry goods. The floor is sloped for maximum drainage and a slot is provided for a plug while not in use. The exterior design enables secure maneuverability by both pallet jack and forklift, and is suitable for multi-level stacking, with or without lids. The containers can also be three-packed for easy return.

Part #	Description	USG	LTR	Lbs	Kg	Inside/Outside (inches)		
						L	W	H
DS800	Non-insulated container	184.3	709	132.2	60.1	44.9/47.4	39.5/42.4	27.9/34.4
