Dock Ladders

Get in and out of the water with ease using one of our many options of dock ladders. Choose from stainless steel, plastic, or aluminum ladders, with different models available for use at ocean marinas, lake properties or other swimming locations.

Aluminum Dock Ladders

Stationary Dock Lift Ladder

Part #	Description	Height (in)	Weight (lbs)
LL-3	3-Step	62	21
LL-4	4-Step	62	23
LL-5	5-Step	62	28
LL-6	6-Step	72	30
LL-7	7-Step	72	33

These retractable ladders are perfect for seawalls and stationary docks with fluctuating water lines and serve as a great safety feature for commercial marinas for accidental fall-ins. They have a fixed section of ladd that extends down from the top surface of the dock approximately 28" and a retractable extension section to pull up and out of the water to avoid marine growth. Extend when on the dock or in the water. Made from marine-grade aluminum, giving them long-lasting durability.

Floating Dock Lift Ladder

Part #	Description	Height (in)	Weight (lbs)
FL-3	3-Step	50	19
FL-4	4-Step	50	23
FL-5	5-Step	50	28
FL-6	6-Step	62	27
FL-7	7-Step	72	33

These ladders provide no obstruction to walking areas and are a great safety feature for commercial marinas or accidental fall-ins. Ladders have a fixed section that extends down from the top surface of the dock approx. 14" and a retractable extension section to pull up and out of the water to avoid marine growth. Can easily be extended when one is on the dock or in the water. Made from marine-grade aluminum, giving them long-lasting durability.

Aluminum Dock Ladders Continued

Finger Pier Lift Ladder

Part #	Description	Height (in)	Weight (lbs)
FPL-3	3-Step	50	20
FPL-4	4-Step	50	22
FPL-5	5-Step	50	25
FPL-6	6-Step	50	27
FPL-7	7-Step	72	32

Made from marine grade aluminum, this lift ladder has a fixed section of ladder that extends down from the top surface of the dock approx. 28" and a retractable extension section to pull up and out of the water to avoid marine growth. Extend it easily when on the dock or in the water.

Makes a great safety feature for commercial marinas for accidental fall-ins, especially ideal for narrow dock fingers with no obstruction of walkway. Durable and long-lasting.

Standard Finger Pier Ladder

Part #	Description	Height (in)	Weight (lbs)
FP-3	3-Step	62	19
FP-4	4-Step	74	22
FP-5	5-Step	86	24
FP-6	6-Step	98	27
FP-7	7-Step	110	29

If you're looking for an economical and practical solution for narrow finger piers, our Finger Pier Ladders made a good choice. Made from marine grade aluminum, they are durable and long-lasting. With no hoop handles and only 6" intrusion into dock, they won't obstruct your walkway. The height above dock surface is 26", and the distance below dock surface of first rung 12-14".

Aluminum Dock Ladders Continued

Swinging Ladder

Part #	Description	Height (in)	Weight (lbs)
SWL-3	3-Step	50	23
SWL-4	4-Step	50	26
SWL-5	5-Step	62	29
SWL-6	6-Step	72	32
SWL-7	7-Step	78	35

Aluminum swinging ladders come with a fixed stainless steel bolt through it which pivots in a self-lubricating brass bushing installed in the bracket for maximum wear. The ladder can be stored up and out of water (90°) and features a "quick" release pin to lock in the upright position. Alternatively, the ladder section can be removed (leaving mounting brackets bolted to deck) to prevent theft when away. Perfect for keeping side rails and steps clean and avoiding marine growth.

Straight Ladder

Part #	Description	Height (in)	Weight (lbs)
SL-3	3-Step	50	19
SL-4	4-Step	50	22
SL-5	5-Step	62	24
SL-6	6-Step	72	27
SL-7	7-Step	78	29

Perfect for floating lake docks and swim platforms, these standard straight ladders are made from marine grade aluminum, making them an economical but high-quality choice. Durable and long-lasting.

Stainless Steel Dock Ladders

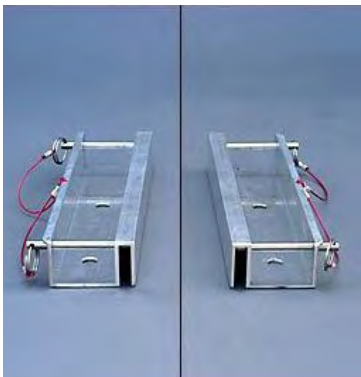

Retractable Up and Out Safety Ladder

Part #	Description	Retracting/Expanding Size (in)	Weight (lbs)
SL 1224	4-Step	12-24	11
SL 1628	4-Step	16-28	11
SL 1640	5-Step	16-40	13
SL 2840	4-Step	28-40	15
SL 2852	5-Step	28-52	18

This stainless steel retractable/extendable safety ladder is easily deployed when in the water, making perfect for "accidental" swimmers. Just a firm pull downward on the bottom rung deloys and extends the ladder. Compact in size, the ladder can be stored in retracted position when not in use, or, if theft is a concern, it is easy to remove during the off-season. Features high-visibility colouring and is tested up to 1,000 lbs.

Quick Release Ladder Brackets

Part #	Description	Size (in)	Weight (lbs)
L-QR	Quick Release Ladder Brackets	11 x 3 x 1.5	5

Ladder brackets allow for quick and easy removal of ladder when not in use, during the off-season or when theft is a concern. Can be used with the Straight and Lift Ladders. Made from high quality marine grade aluminum to be long lasting & corrosion-resistant.

Plastic Dock Ladders

barrplastics.com | 1.800.665.4499

Part #	Description	Height (in)	Weight (lbs)
DL-4	4-Step	64	12
DL-5	5-Step	76	16

These sandstone coloured ladders are made of HD thick and durable roto-molded polytehtylene. Ladders fill with water when submerged and drains when elevated, locking into place when up or down. Both models are corrosion-resistant, comfortable for feet, UV-protected for the long term, and the 5-step model is angled for easier climbing to even be used by dogs.
