THE MINI-RACKER™ SYSTEM

THE MOST EFFICIENT DISPENSING/STORAGE SYSTEM YOU CAN BUY!

The Mini Racker-Stacker™ System is ideal for storage and dispensing of small containers with built-in spill protection and patented enclosed sump. The system has a mobility option to make movement around the plant safe and easy, too. The Mini Racker-Stacker™ System helps save liquids that are routinely lost during the dispensing process and helps protect worker safety by keeping the dispensing area neat and clean.

The Mini Racker Stacker™ System consists of the base Racker that will hold two (2) 20 liter cube containers, 5–6.5 US gallon metal or plastic lidded pails or cans, or two (2) 5 US gallon or smaller metal or plastic “jerry cans”. The Mini-Racker™ module is available in two (2) versions: “Place and Use” (6010-YE) and “Mobile” version (6011-YE-M) which includes wheels and handle. The Mini-Stacker™ module can be used in conjunction with the Racker to add an extra level of storage, or separately with another containment solution to mix-and-match the user’s specific need.

Handle flips up on the Mobile Unit for compact storage.*

PATENTED ENCLOSED SUMP

Made of highly durable and chemically compatible polyethylene, ENPAC’s Mini Racker-Stacker™ System is equipped with a patented enclosed sump so that spills are truly portable, and the user isn’t “stuck” when a spill occurs. Stacker locks securely on to racker or another stacker for convenience.

It’s wheels and handle make the Mini Racker-Stacker™ Mobile Unit portable throughout the plant. It fits easily through standard doorway openings.

*Mobile unit includes handle.
