- Slim design for loading drums into salvage drums
- 1,000 lb. handling capacity

**Roller Technique:** Place damaged drum and overpack on their sides with metal rollers underneath drum (i.e. water pipe). Roll drum most of the way inside. Slowly turn overpack upright.

**Angle Roll Technique:** Place overpack and drum on side with the two angled in a wide vee. Roll together, working the drum inside the overpack. When inward progress stops, reverse the angle and roll the other way. Turn upright when drum is inside the overpack.

**Inverted Overpack Technique:** Place damaged drum on overpack lid. Slide overpack over the drum. Rotate upright.

**Upright Overpack Technique:** Remove overpack lid while using Part #: 3100-BU to raise and lower drum. Reduces risk and increases use.
